## QSil 550 2 part encapsulation and potting silicone

Description	Property	Test Method	Value
<ul> <li>QSil 500 series are 100% silicone solids elastomer designed for electronic potting and encapsulation applications. The two-component system offers a flame retardant, thermally conductive, low modulus material that is readily repairable.</li> <li>Key Features <ul> <li>Long pot life</li> <li>Low modulus and good elongation</li> <li>275 C Max Working Temp, test method AFS1540B</li> <li>UL94 V0 listed in file No. E205830</li> </ul> </li> </ul>	Uncured Product Color A Color B Cure Profile Cure Type Density A Density B Gel Time at 25°C/77°F	BS ISO 2781 BS ISO 2781	Beige Black 7 mins at 150°C Addition 1.41 1.41 130 min
Application	Mix Ratio By Weight		1:1
QSil 550 is designed for potting electronics to provide environmental protection (e.g. Sterilization units). Suitable for higher working temperatures.	Rheology Self Bonding		Liquid No
Use and Cure Information	Viscosity Mixed	Brookfield	4000 cP
Mixing:	Cured Product		
In order to achieve optimum performance, the same lot number of A and B should be used. The A and B parts should be thoroughly mixed prior to catalyzation.	7 minutes at 150°C Color	10.0.07	Gray
Mixing by hand: Catalyze the A part with the B part at the	Elongation at Break	ISO 37	150 %
designated mix ratio by weight using a clean plastic or metal	Hardness Shore A	ASTM D 2240- 95	55
container of approximately 3 times the volume of the material and mix by hand. Accurate weighing of all components, on a suitable scale, is essential for optimal product performance when mixing by hand. Mix until the material is uniform with no visible striations. Mixing and dispensing with automatic equipment: Use a mixing system that will properly mix the A and B parts at the designated ratio by weight.	Max Working Temp Min Working Temp Tear Resistance (N/mm) Tensile Strength Thermal Conductivity	BS ISO 34-1 ISO 37	275 °C / 527 °F -55 °C / -67 °F 5.73 N/mm / 33 ppi 3.52 N/mm2 / 510 psi ~0.37 W/mK
De-aeration:	UL 94V-0		Yes
Air trapped during mixing should be removed by vacuum at 29	UL File No.		E205830
inches of mercury. During the process, the material will expand, and intermittent evacuation may be required. Machine mixed material does not normally need to be de-aired.	Electrical Properties Dielectric Constant	ASTM D-150	3.12
Health & Safety			20.3 kV/mm / 516
Safety Data Sheets available on request.	Dielectric Strength kV/mm	ASTM D-149	V/mil
Packaging	Dissipation Factor	ASTM D-150	0.003
CHT Encapsulating and potting compounds are available in a variety packaging including bulk containers. Please contact our	Volume Resistivity (Ohms cm)	ASTM D-257	1.47E+15 ohms cm
sales department for more information.	Storage		
Storage:	Max Storage Temperature		38 °C / 100 °F
This product is best when used within the "Lise by Date". See	<u> </u>		

This product is best when used within the "Use by Date". See product label and/or CoA for specific "Use by Date". Product

should be stored in its original, unopened container. Storage beyond the date specified on the label does not necessarily mean that the product is no longer usable. In this case, the properties required for the intended use should be checked for quality assurance reasons.
