

ALPATEC AM ADDITIVE Textile Coating Additive

Key Features

- Pigment dispersion in vinyl siloxane polymer
- Non migrating when used in CHT addition cure elastomers
- For use on printing textiles
- For use with ALPAPRINT CLEAR

Application

ALPATEC AM ADDITIVE is stirred into ALPAPRINT CLEAR and applied as pre-print on strongly subliming dark synthetic qualities (polyester, polyester/cotton) which have been dyed with disperse dyestuffs. The pre-print serves as sublimation barrier and prevents the dyestuffs from migrating into the printing motif.

Property

Uncured Product

Color

Black

Cure Profile

2 – 3 min at 130 °C.

Storage

Max Storage

30 °C / 86 °F

Temperature

Min Storage Temperature

5 °C / 41 °F

Shelf Life

12 mths
