

EM 1463 Food grade 350 cSt polydimethylsiloxane emulsion

Description

This product is a food grade emulsion of a polydimethylsiloxane fluid.

Key Features

- Best in class dilution and formulation stability
- Has shown industry-best dilution stability at 1% actives
- Proven in food grade applications
-

Key Applications

- Mold Release
- Chain lubricant
- Food contact release agent
- Incidental food contact lubricant

Application

EM 1463 is a high performing, ultrafine particle size emulsion of 350 centistoke polydimethylsiloxane fluid that is 35% active and has been formulated for direct food contact application. EM 1463 is designed to be used as a denesting, antistatic release agent as well as conveyor chain lubricant in direct food contact applications.

Use and Cure Information

This product can be diluted in water or an aqueous media before use. If unsure where to start the dilution, it is recommended to dilute one-part product to 30 parts water/aqueous media. This dilution is then applied to the food contact surface by spraying, wiping, brushing, or dipping.

Health & Safety

This product is not intended for pharmaceutical use. It is the responsibility of the user to ensure acceptable compatibility with intended food contact surfaces.
